

Iteration 2 – report

Participants: dev team - Itai Ezra, Nachum Shpigelman, Yogev Cohen.

Client - Igor ostinsky.

Date: 25.12.12

After finishing the second milestone, we reviewed it with our client and come to the following conclusions:

1. We are keeping up with the schedule, the site is fully functioning.
2. We created a profile page for the re – now he can use chat and he can present the pictures of those inside.
3. There are few points to improve and to add by next iteration:
 - * Improve the design of the website.
 - * The client prefers Post instead of chat, but it's also good.
4. Overall the client is happy with the progress, and hope we will continue this work rate.
